The Use of this Table is this: If you would know what the Interest of 100 and 5 l. is for 9 Months at 6 per Cent. then in the first Column find out 100 at the foot of the Column, and right against it under the Title 9 Months, (which is the fifth Column) here you shall find 4 l. 10 s. and against the Number 5 l. you shall find 4 s. 6 d. So that the Interest of 100 and 5 l. for 9 Months comes to 4 l. 14 s. 6 d. The same of all the rest.

This is the season for good Husbands to lop and prune superfluous branches from Fruit-trees, uncover their Roots, set all kind of Quick-sets and Fruit-trees in the New of the Moon. Be sure the Wind be not North nor East; and set the same sides to the South and West, which grew at the first. Set Beans, Pease and Parsnips. The weather mild and Moon decreasing, dig Gardens, drench weak & sick Cattle, Kine with Verjuice, Horses with Water and Ground Malt sodden with a little Bran.

In this Month let not Blood nor use Physick, unless necessity constrain thee. Beware of taking cold, for Rheums and Flegm do much increase this Month. It's hurtful to fast long; to drink White-wine fasting is good. Use Meats that are moderately hot for the best Physick is warm Diet, warm Cloaths, and a merry honest Wife.

February hath xxviii days.

This Month cut, set, and lay Quickſets and Roſes, as all other Plants. Set and Plant Vines, Hops, & all fruit that grows on buſhes. Sow Peaſe, Beans, and Onions: Furniſh your Gardens with Salads and Pot-herbs for Summer. Prune and trim all ſorts of Fruit-trees from Moſs, Cankers, and ſuperfluous branches. Remove Grafts of young Trees in the laſt Quarter, the Moon being in *Aries*, *Libra*, or *Scorpio*.

If neceſſity urge, you may let Blood, but be ſparing in Phyſick: And be ſure when a warm day comes, to prevent taking of cold through careleſneſs, for the warm air this month is not laſting, but oft deceives us to our prejudice.

In this month, ſlimy Fiſh, Milk and the like, that do oppilate and ſtop the Liver and the Veins, and thicken the Blood, are to be eſchewed as Enemies to Health.

Now regarding the Wind & Weather, graft, cut Quickſets, cover the Roots of Fruit-trees (opened in *December* and *January*) with fat Earth; ſow Oats, Barley, Parſnips, Onions, Carrots, Melons, Cucumbers, and all kind of Pot-herbs; ſlip Artichokes and Sage, and ſow all manner of Garden-ſeeds.

Now adviſe with the honeſt and able Aſtrological Phyſician. It is good to purge & let blood, for in this Month the Humours and Blood increaſe, and groſs feeding breeds groſs Blood and Humours; therefore uſe Meats of good digeſtion, and ſuch as afford good Juice & Nutriment to the Body. Forbear all things ſalt, purge the Blood by Potions and Blood-letting. Sweet-Meats and Drinks are commendable. Be ſure to eat in the Morning before you drink.

This Month Sow Hemp and Flax, pole Hops, set and sow all kinds of Garden Herbs. Restore the liberty of the laborious Bee by opening her Hive. Bark Trees for Tanners; and let good Housewives mind their Gardens, and begin to think of their Dairies.

In Gard'ning ne'er this Rule forget
For to sow dry, and to set wet.

The use of Physick becomes now seasonable, as also Purging and Blood-letting. It is good to abstain from Wine, for many Diseases will be taken thereby to the ruine of many.

This Month the Pores of the Body are open, and apt to receive Physick; therefore this is the best time to remove and prevent causes of sickness, or for speedy remedy in extremity: Pray to God for a Blessing.

This Month commands the provident Housewife, and the prudent Artists, to set their Stills on work. In the beginning of the Month sow and set those tender Summer-herbs that would not endure the former cold. Weed your Hop-Gardens, cut off superfluous Branches, Moss Trees and Gardens, and weed Corn; Rise early and walk the Fields and Gardens.

Now every Garden & Hedge affords thee Food and Physick. Rise early, walk the Fields by running streams, the North and West sides. Sage and sweet Butter an excellent Breakfast. Clarified Whey with Sage, Scurvy-Grass Ale, and Wormwood Beer, are wholsom Drinks. Green Whey excellent against Choler. Eat and drink betimes in the Morning. Abstain from Meats that are hot in Nature, and salt in Quality.

Get Rue, Wormwood, & Gall, to ſtrew your Floors, to deſtroy Fleas. At the Full Moon gather Flowers and Seeds, dry your Flowers rather in the ſhade, than in the Sun, which too much exhaleth their Virtue; but to avoid Corruption, let the Suns heat a little viſit them.

Beware of violent heat, and ſudden cold, which are the great diſtempers of this Month, and produce peſtilential diſeaſes. Forbear ſuperfluous drinking, but eat heartily; uſe cold herbs and meats, abſtain from Phyſic. Now the Rivers are more wholſome than the Baths. In time of Peſtilence keep your Chamber. Windows ſhut till the Sun have force of ſhining. Perfume your Chamber every Morning with Tar, upon a Chafing-diſh of Coals. Uſe *Cardaus Benedictus* boiled, and drink faſting.

Now with thankfulness reap your desired Harvest; sow Winter-Herbs in the New of the Moon. Esteem fair Weather as precious, and misspend it not. Gather Garden-seeds near the Full. Use moderate Diet, forbear to sleep presently after meat. Take heed of sudden cold after heat.

Beware of Physick and Bloodletting in the Dog-days, if the Air be hot; otherwise, if occasion require, you may safely make use thereof. Now moderate Diet is best. Beware of Surfeits Hears and Colds, for Pleurisies are engendred thereby. Use not to sleep much, especially in the afternoon, for that brings Appilations, headach, Agues and Catharrs, and all noysome Distempers of the same kind. Red Wine and Claret are excellent Remedies for Children against the Worms.

The beginning of this Month, and the end of the former, gather Hops, their Complexion being brown, and the weather fair, and no Dew on the Ground. Kill Bees, make Verjuice, remove and set all slips of Flowers between the two Lady-days. Remove Trees from *September* till *February*, especially in the New of the Moon. The Weather warm, and the Wind South or West, cut Quicksets, gather ripe Fruit, sow Wheat and Rye, Winter Parsnips and Carrots; and set Roses, Strawberies, and Barberies.

Sow Wheat and Rye, remove young Plants and Trees about the New Moon, observing this as a seasonable Secret, that in setting, you carefully place that side to the South and VVest, which were so before you took up the Plant; otherwise the cold kills it. Gather your remaining VVinter-Fruit, set all kinds of Nuts and Acorns, and cut Rose-trees but once in two Years, if you intend to have store of Roses.

The Garments you last Month hung on your Backs in jest, now button them close in good earnest: Cloath you now for prevention, for the cold comes insensibly, and Fogs oft-times beget a whole VVinters cold. Consult with your Taylors, as well as Physitians.

Contentment swells a Mite into a Talent, and makes a Man richer than the *Indies*.

Set Crab-tree ſtocks to graft on: In the old of the Moon, ſet Peaſe and Beans, and ſow Parſnips and Carrots: Trench Gardens with Dung, uncover the roots of your Apple-trees, and ſo let them remain till *March*. Kill Swine in or near the Full of the Moon, and the fleſh will the better prove in the boiling.

The beſt Phyſick this Month is good exerciſe, warm and wholſom meat and drink: But if any diſtemper afflict the body, finiſh your Phyſick this month, and ſo reſt till *March*, unleſs neceſſity urge. Uſe good Meat, and wholſom Drinks to nouriſh the blood. Be ſure to go dry of your Feet: For if not, (unleſs it be thoſe always uſed to it) be certain to be troubled with Rheums and Cold, and other inconveniencies attending.

In the last quarter of the Moon this Month and the next, are the best times to fell Timber: Let Fowlers mind their Game. Cover all your best Flowers and Herbs from cold and storms, with rotten Horse-dung. Look well to the Cattle, blood Horses. Let a warm Bed, and a Cup of Nectar be the Bath, the Kitchin thy Apothecaries Shop, hot Meats & Broths thy Physick, and a well-spread Table the proof of thy Charity to thy poor Neighbors.

A Description of the Four Quarters of the Year.

THe *Spring Quarter* begins this Year *March* 10. near half an hour after 7 in the morning; which time the *Sun* enters the *Equinoctial Sign Aries*, causing an equality of Day and Night all the habitable World over. *Summer* begins *June* 11. near 8 in the morning, the Sun then approaching neareſt to our Zenith, and enters the firſt Scruple of our *Tropical* Sign *Cancer*, making the longeſt days with us, and the ſhorteſt nights. *Autumn*, or *Harveſt Quarter*, commences *September* 12, at 8 at night, the Sun then touching the firſt Scruple of the other *Equinoctial* Sign *Libra*, and again equalizeth both day and night. *Winter* begins *December* 11. near half an hour paſt 11 in the morning, and then the *Sun* touches the firſt point of the *Tropical* Sign *Capricorn*, making with us the ſhorteſt day and the longeſt night in the year; but to thoſe that are our *Antipodes*, the contrary.

Of the Eclipſes this year 1703.

THere will be this year Six Eclipſes of the *Luminaries*, Four of the *Sun*, and Two of the *Moon*, but all thoſe of the *Sun* inviſible to us, and the two of the *Moon* may be ſeen to us if the Air be clear. The firſt, of the *Sun*, falls on *Jan.* 6. at 11 in the morning, but inviſible, by reaſon of *Parallax* and great South Latitude, &c. The ſecond will be a Total Eclipſe of the *Moon* upon *June* 18. at 15 min. paſt 1, in the morning. The third will be an Eclipſe of the *Sun* on *July* 3. at 3 in the morning; and the fourth alſo of the *Sun* on *Nov.* 27. about Sun-ſet inviſible to us. The fifth will be of the *Moon* a total Eclipſe, and near Central, upon *Dec.* 13. near 7 in the morning, and may be ſeen if Clouds do not interpoſe. The ſixth and laſt will be of the *Sun* on *Dec.* 27. at 3 in the morning, and not to be ſeen with us, or ſcarce any where elſe in the whole World.
